LEGO® Builder

INGENIOUS IN ITS SIMPLICITY

The bicycle is one of the most ingenious technological inventions to emerge from the Industrial Revolution. Since the first simple, affordable versions became readily available in the late 19th century, the bicycle has paved the road to personal freedom and independence. Today's road and racing bikes carry that legacy forwards: sleek, minimalistic and fine-tuned for speed and endurance. For those who seek healthier, more sustainable ways of living, the bicycle stands as a cultural and environmental icon, embodying aesthetics, performance and ingenuity.

FROM THE LEGO® ICONS DESIGN TEAM

Biking is a passion for many people around the world, including Denmark, home of the LEGO Group! But could we build one out of (mostly square) LEGO® bricks? It was a challenging engineering task to build a stable design. Especially around the head tube, where the top and bottom tubes meet to create the socket for the front fork. Choosing a large scale was key to getting the proportions right, and the display stand adds extra stability in both presentation and handling.

FUNCTION IN MOTION

1 ▶

New tyre element – the first
to sit on a brick-built wheel

2 ▶

New segmented rim
element

3 ▶

New spoke element

4 ▶

New large 64-tooth gear,
essential for chain-drive system

5 ▶

Crank and chain mechanism
drives rear wheel

6 ▶

New one-way gear for
authentic coasting

7 ▶

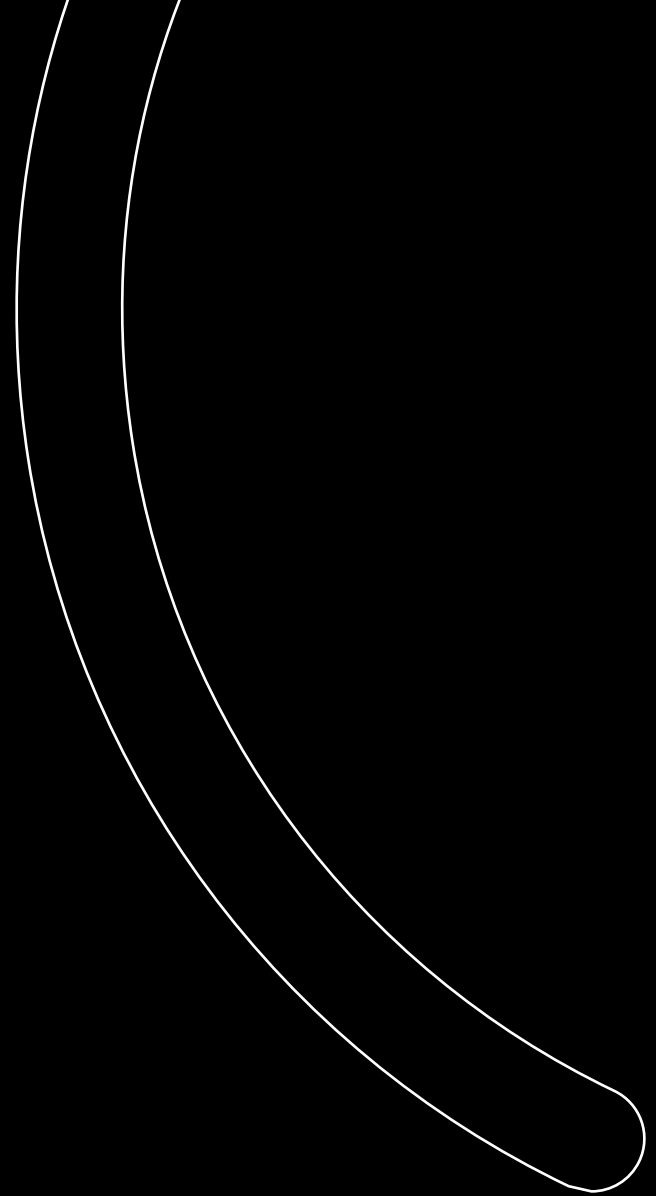

Removable training stand

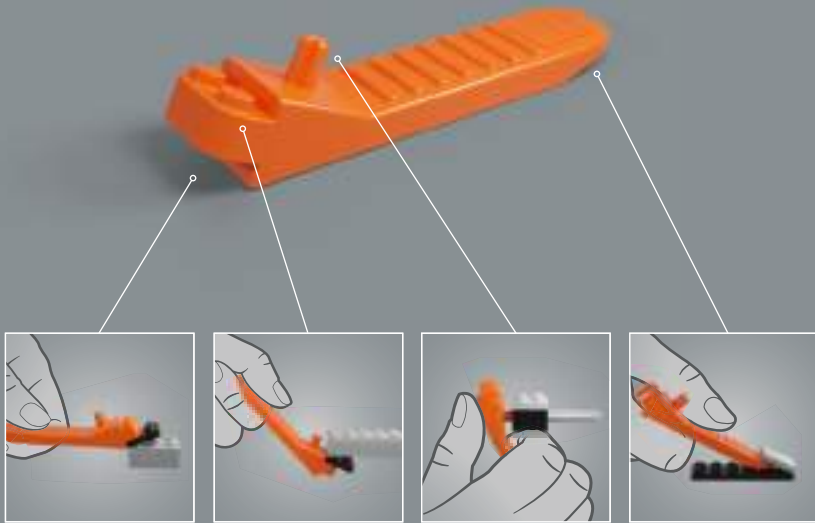

8 ▶

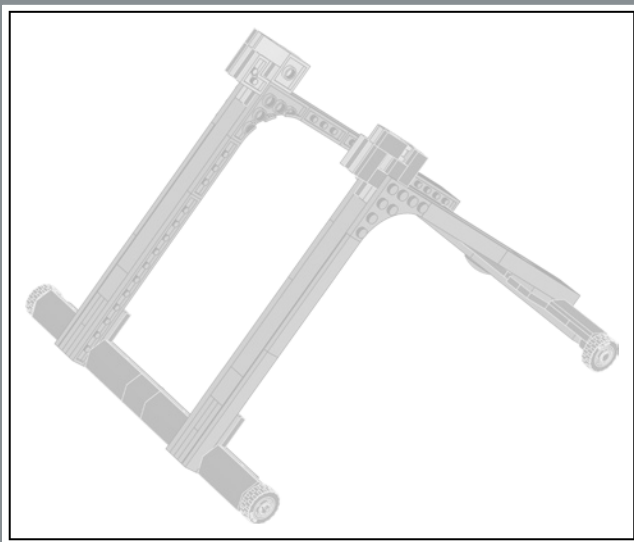

Removable water bottle

9 ▶

Removable rear light

1

Who says you can't use your bike indoors?
