IMOLIMO PROČITAJTE OVAJ PRIRUČNIK PRIJE UPORABE PROIZVODA.

Držite priručnik za buduću upotrebu.

! UPOZORENJE! Pročitajte sve sigurnosne upozorenja i savjete za sigurnost.

Hlače u daljnjem tekstu "odjeća" ili "zaštitna odjeća" - proizvode se u skladu EN ISO 13688:2013/A1:2021, PN-P-84525 (Uredbom 2016/425. Adresna web stranice na kojoj možete pristupiti EU deklaracijama i postavljanju propisa: www.lahtipro.eu

Ova je odjeća osobna zaštitna oprema jedinstvenog dizajna, koja pripada **prvoj kategoriji**, a namijenjena je zaštiti korisnika od utjecaja mehaničkih čimbenika, čiji su učinci površni.

1. KORIŠTENJE

Veličinu odjeće treba odabrati na pravi način. Prilikom odabira veličine odjeće treba imati na umu da je ona udobna i da daje slobodu kretanja. Provjerite veličinu isprobavajući odjeću prije početka rada.

Zaštitnu odjeću treba odabrati na odgovarajući način za upotrebu na radnom mjestu. Prema uputama za zaštitna na radu.

Zaštitnu odjeću trebate nositi u svako doba tijekom bilo koje posla u kojem postoji opasnost od tjelesnih ozljeda s površinskim učincima.

2. MATERIJAL

Osnovna tkanina: 100% pamuk 270 g ± 10 g / m².

Umetanje: Oxford 600D 100% poliester 270 g ± 10 g / m².

Materijali korišteni za proizvodnju uglavnom ne izazivaju iritaciju kože ili alergijske reakcije. Međutim, mogu postojati pojedinačni slučajevi takvih reakcija kod ljudi alergičnih na plastiku. Trebate prestati koristiti ovu odjeću i posavjetovati se s liječnikom. Proizvod ne koristi materijale koji mogu izazvati alergijske reakcije ili mogu biti kancerogeni, toksični ili mutageni.

3. OGRANIČENJA ZAŠTITE

Odjeća štiti samo dijelove tijela koje pokriva. Ne štiti korisnika od visokih i niskih temperatura. Izbjegavajte kontakt s plamenom. Razina zaštite odnosi se samo na materijal od kojeg je odjeća šivena i vrijedi samo za novu, neopranu i ne popravlenu odjeću. Ova razina zaštite temelji se na ispitivanju provedenom u skladu s gore navedenim, normalno o novoj odjeći i ne uzima u obzir promjene koje su posljedica njihovog trošenja.

■ Čimbenici koji uzrokuju gubitak zaštitnih svojstava:

- a) natapanje vodom;
- b) viske ili vuče površine;
- c) niske temperature;
- d) otapala;
- e) kemikalije, kiseline, baze;
- f) korozivna sredstva;

! ПРЕЖДЕ ЧЕМ ПРИСТУПИТЬ К ЭКСПЛУАТАЦИИ, НЕОБХОДИМО ОЗНАКОМИТЬСЯ С НАСТОЯЩЕЙ ИНСТРУКЦИЕЙ.

Храните инструкцию для возможного применения в будущем.

! ПРЕДУПРЕЖДЕНИЕ! Необходимо ознакомиться со всеми предупреждениями, касающимися безопасности при эксплуатации в соответствии с потенциальными возможностями.

Куртка, брюки и полукомбинезон, – далее, «одежда» или «защитная одежда», – произведены согласно европейскому стандарту EN ISO 13688:2013/A1:2021, PN-P-84525 и постановлению 2016/425. Адрес веб-сайта, на котором можно получить доступ к европейскому соответствию EN: www.lahtipro.pl

Настоящая одежда является средством индивидуальной защиты с простой конструкцией, относящимся к **категории I** и предназначенная для защиты пользователя от поверхностного механического воздействия.

ВНИМАНИЕ! В случае наличия каких-либо механических повреждений, протечки жидкостей, разрывов, поврежденной застёжки, одежды становится непригодной к применению независимо от того, сколько элементов прошито или изготовлено.

После завершения пользования одеждой необходимо утилизировать её в соответствии с действующими правилами.

Защитная одежда должна быть подобрана для применения на рабочем месте в соответствии с Инструкцией по технике безопасности для данного рабочего места.

Защитную одежду следует носить в течение всего времени выполнения каждой работы, при которой существует опасность повреждения тела в результате поверхностного воздействия на него.

2. МАТЕРИАЛ

Основная ткань: 100% хлопок 270 г ± 10 г/м².

Вставки: Оксфорд 600D 100% полиэстер 270 г ± 10 г/м².

Применённые для изготовления одежды материалы в общем не вызывают раздражения кожи или аллергической реакции. В редких случаях могут иметь место индивидуальные случаи такой реакции у лиц, имеющих аллергию к пластмассам. В этих случаях необходимо прекратить использование этой одежды и проконсультироваться с врачом. Однако не содержит материалов, могущих вызвать аллергические реакции или оказывающих канцерогенное, токсическое или мутагенное воздействие.

3. ОГРАНИЧЕНИЯ ЗАЩИТЫ

Одежда защищает только те части тела, которые закрыты ею. Она не защищает пользователя от высокой и низкой температур. Избегайте контакта с пламенем. Уровень защиты относится только к материалу, из которого изготовлена одежда и обеспечивает только сухую новую, не стиранную, и бытовую в ремонте одежду. Указанный уровень защиты основан на испытании новой одежды, выполненном в соответствии с указанным выше стандартом и не учитывает изменений, возникающих по причине износа одежды.

■ Факторы, вызывающие потерю защитных свойств:

- a) просачивание воды;
- b) воздействие огня или горячего основания;
- c) воздействие низкой температуры;
- d) растворители;
- e) химические средства, кислоты, щелочи;
- f) другие вещества;</
