Building Up Wind Power

At the LEGO Group, we want to make a positive impact on the world around us. We have committed to making all LEGO® bricks using sustainable materials by 2030 via our Planet Promise, our roadmap to achieving our sustainability goals. Through investments in wind power we have achieved our ambition to balance 100% of the energy we use to make LEGO bricks with energy from renewable sources.

This is why the launch of this wind turbine model is very important to us. Developed in close collaboration with Vestas, the global front-runner in sustainable wind energy, this is also the first Creator Expert model to include LEGO elements from sustainably sourced, plant-based plastic.

So we like to think that this LEGO Vestas Wind Turbine is a small tribute to the innovators of the past and the builders of tomorrow. It's a desktop-sized representation of not only Vestas' technological innovation, but also of the power and potential of sustainability, commitment and collaboration.

In this booklet, we've included some facts about wind energy and our LEGO initiatives focused on sustainability. Find out more about our sustainability commitment at LEGO.com/responsibility-story.

We hope you enjoy building this model as much as we have enjoyed developing it!

Pioneering Sustainable Energy

In the late 1970s during what's now known as the second oil crisis, a small number of engineers were hard at work in a little factory in Western Jutland. The work was carried out in secret, not because they knew their work would change how the world was powered in the future, but because very few believed in their idea. That idea, to harness the power of the wind to produce sustainable energy, was in fact very far from the primary product of their company, Vestas, at the time: kitchen appliances and agricultural machinery.

But the engineers were persistent, and through imagination, experimentation, commitment and collaboration, they and Vestas endeavoured to make their unbelievable idea believable. And so, after several failed attempts, Vestas installed its first wind turbine in 1979 based on the three-bladed design that today still dominates wind energy and is referred to as "the Danish concept".

Since then, both Vestas and wind energy have evolved tremendously together. While Vestas' first wind turbine had a rotor diameter of 32 ft. (10m) and a capacity of 30 kW, today's turbines are several hundred times more powerful, with rotors of more than 492 ft. (150m) in diameter. During this time, wind turbines have gone from being an experiment in a windy part of Denmark to becoming the cheapest source of electricity in markets all over the world.

Today, Vestas and wind energy have changed the global energy landscape, and as the leader within sustainable energy, Vestas has pioneered wind energy in all parts of the world. Wind energy and other sustainable energy sources are overtaking traditional energy sources, and Vestas continues to develop the solutions that will ensure a healthy world for future generations. The journey has just begun, and the imagination, experimentation, collaboration and commitment to the unbelievable that brought the first wind turbines to life, continues to drive Vestas and sustainable energy forward.

About Vestas

Founded in Denmark in the late 19th century, Vestas drives the green transition forward as the world leader in sustainable energy solutions. We design, manufacture, install, and service wind turbines on six continents and have pioneered wind energy in more countries than anyone else. Today, wind energy powers 170 million homes, and as the world continues the transition to sustainable energy, Vestas leads innovation that combines wind energy with other energy sources to ensure a clean, stable energy supply for everyone.

A close-up, low-angle shot of a white wind turbine nacelle against a clear blue sky. The nacelle is the central housing for the generator and gearbox. The Vestas logo is printed in blue on the side of the nacelle. The nacelle is mounted on a thick white tower. The nacelle door is open, revealing the internal mechanical components, including a large black gear and various metal supports.

Why Wind Power?

Tomorrow's energy needs are foreseeable and they will impact all aspects of life. But as energy consumption soars, how will we meet this demand? Fossil fuels are a finite resource that will gradually disappear. The natural replacement is sweeping freely around the Earth. Wind. It's renewable, predictable, fast to install, clean and cheap.

A wind turbine produces energy, pure and simple, and is already today the cheapest source of energy in many countries. And unlike oil, natural gas and other non-renewable materials, the price of wind is predictable, stable, and free in every currency.

Wind energy produces no CO₂, no other greenhouse gases and doesn't consume water, a scarce resource in itself. In fact, a wind turbine can generate 25 to 50 times more energy than it uses in its entire lifecycle, and it is only responsible for emission of around one percent of CO₂ compared to a conventional coal power plant.

Wind knows no limits, nor does it recognize national boundaries. It's an unlimited form of energy, and it's found freely in countries with even the poorest natural resources. Wherever it blows, it can bring jobs to support the local economy while lowering dependence on energy imports.

How does it all work?

Wind Energy Basics

Like all other weather and climate occurrences on the planet, wind stems from the sun. When the sun unevenly heats the irregular surface of the Earth's atmosphere as it rotates, wind is created. The motion energy caused by the movement of air over the Earth's terrain is called wind flow.

Wind power uses the Earth's atmosphere's natural airflows to produce electricity. To do so, the wind turbine blades capture the wind's kinetic energy, which makes the rotor spin, creating mechanical energy. The rotor turns an internal shaft, which is connected to the gearbox, which again changes the rotations from low-speed to high-speed. The high-speed shaft is connected to the generator, which creates electricity.

Each wind turbine is designed for different wind conditions, and wind turbines are carefully positioned based on numerous factors such as average wind speeds, landscape and turbulence. By choosing the right location and the right turbine for each site, wind turbines harness energy in the most efficient way.

Once generated by the wind turbine, the electricity is transmitted through underground cables called the transmission line to a grid substation where the voltage is adapted and connected to the grid. From there, the electricity travels through cables into our homes.

This particular element is found in the LEGO® Vestas Wind Turbine.

Plants from Plants

The Vestas Wind Turbine features LEGO® tree elements made from plant-based plastic. Moving forward, LEGO botanical elements such as leaves, bushes and trees will all be made from this plant-based plastic, as part of our commitment to using sustainable materials in core products by 2030 and in packaging by 2025.

These new LEGO plant-based elements are derived from sugarcane. The material is identical to the plastic used in older bricks, but is produced from sustainable sources. As always, any two LEGO bricks can fit together – even if they are made from different materials, decades apart.

- Making It Real

As part of our mission, we have made a Planet Promise, built on the idea of leaving a positive impact on the world and future generations. Our biggest contribution to society is to inspire learning through play and help children realize their full potential. We strive to do so while safeguarding natural resources and minimizing our environmental impact.

To achieve this, we:

- Work to reduce CO₂ emissions in our operations and supply chain
- Invest in renewable energy and sustainable materials
- Work to reduce and recycle waste, and
- Inspire children to imagine sustainable solutions to important environmental challenges.

Wind Power Propels the LEGO Group

In 2017, we achieved our ambition to balance 100% of the energy we used to make LEGO® bricks with energy from renewable sources, three years ahead of schedule. Since 2012, the LEGO Group's parent company, KIRKBI A/S, has invested in the development of more than 160 megawatts of renewable energy generation, including wind farms in Germany and the UK.

The total energy output from investments in renewables is now greater than the energy consumed at all LEGO factories, stores and offices.

+1,900 households

Can be powered every year, in Europe with only one **V90-2.0 MW™** Vestas wind turbine.

The hub of the Vestas V90-2.0™ turbine is approximately the same height, 314 ft. (96m), as the top tip of Big Ben in London.

+150 households

Can powered every year, with the current electricity consumption in Europe, with only one **V29-225 kW** Vestas wind turbine.

The length of the blades of the Vestas V29-225 kW turbine is 6 ft. (2m) longer than a London double-decker bus.

+4,700 households

Can be powered every year, in Europe with only one **V150-4.2 MW™** Vestas wind turbine.

The rotor diameter of the Vestas V150-4.2 MV™ turbine is 98 ft. (30 m) larger than the rotor diameter of the London Eye, which is 393 ft. (120m).

Important information about batteries

Never use different types of batteries together, or a combination of old and new batteries. Always remove the batteries if the product is not to be used for a long time or if the batteries have run down. Never use damaged batteries. Only use batteries of the type recommended, or a corresponding type. Insert the batteries so that the poles are correctly positioned. Rechargeable batteries must be recharged using the correct battery charger under the supervision of an adult. You cannot recharge batteries while they are still in the product, and you must never try to do so. Never attempt to recharge non-rechargeable batteries. Never short-circuit the battery holder.

Wichtige Informationen zu Batterien

Benutzen Sie niemals unterschiedlich Arten von Batterien oder alte und neue gleichzeitig. Nehmen Sie stets die Batterien heraus, wenn mit dem Modell längere Zeit nicht gespielt wird oder wenn die Batterien leer sind. Verwenden Sie niemals beschädigte Batterien. Verwenden Sie ausschließlich empfohlene bzw. geeignete Batterien. Achten Sie beim Einsetzen der Batterien auf die richtige Polung. Wiederaufladbare Batterien sollten mit einem geeigneten Ladegerät aufgeladen werden - unter der Aufsicht eines Erwachsenen. Wiederaufladbare Batterien können und sollten niemals aufgeladen werden, während sie sich im Modell befinden. Versuchen Sie unter keinen Umständen, „normale“ Batterien wieder aufzuladen. Schließen Sie das Batteriefach niemals kurz.

Informations importantes concernant les piles

Ne jamais utiliser un mélange de différents types de piles, ou de piles neuves et de piles anciennes ou déjà utilisées. Toujours retirer les piles si le produit n'est pas utilisé durant une période prolongée ou si les piles sont vides. Ne jamais utiliser de piles endommagées. Utiliser uniquement des piles du type recommandé ou d'un type équivalent. En insérant les piles, respecter scrupuleusement le sens d'orientation des pôles (+/-). Les piles rechargeables doivent être rechargées en utilisant un chargeur de piles adéquat et sous la surveillance d'un adulte. Il est impossible de recharger les piles quand elles sont installées dans le produit. Ne jamais tenter de le faire. Ne jamais essayer de recharger des piles non-rechargeables. Ne jamais court-circuiter le compartiment des piles.

Importanti informazioni sulle batterie

Non usare mai contemporaneamente batterie di tipo diverso o batterie nuove e usate insieme. Rimuovere sempre le batterie qualora il prodotto non venga utilizzato per periodi prolungati, oppure se le batterie sono esauste. Non utilizzare mai batterie danneggiate. Usare esclusivamente batterie del tipo raccomandato o un equivalente. Inserire le batterie avendo cura che la loro polarità sia corretta. Le batterie ricaricabili vanno ricaricate in un caricabatterie di tipo idoneo e con la supervisione di un adulto. Non è possibile e non bisogna mai tentare di ricaricare le batterie mentre queste sono inserite nel prodotto. Non tentare mai di ricaricare batterie non ricaricabili. Non cortocircuitare mai il portabatterie.

Belangrijke informatie over batterijen

Gebruik nooit verschillende soorten of een combinatie van oude en nieuwe batterijen tegelijkertijd. Verwijder de batterijen altijd als je het product lange tijd niet wilt gebruiken of als batterijen leeg zijn. Gebruik nooit beschadigde batterijen. Gebruik uitsluitend batterijen van het aanbevolen type of een overeenkomstig type. Plaats de batterijen met de polen in de juiste richting. Oplaadbare batterijen moeten in een voor dit doel bestemde oplader en onder toezicht van een volwassene opnieuw worden opgeladen. Oplaadbare batterijen kunnen niet worden opgeladen terwijl ze zich nog in het product bevinden en dit mag ook nooit worden geprobeerd. Probeer nooit niet-oplaadbare batterijen opnieuw op te laden. Laat de batterijhouder nooit kortsluiten.

Información importante acerca de las pilas

No use pilas de diferentes tipos ni pilas nuevas y antiguas para alimentar el producto. Extraiga las pilas del producto si este va a permanecer sin uso durante un período prolongado de tiempo o aquellas se han agotado. No use pilas dañadas. Use sólo pilas del tipo recomendado u otro equivalente. Inserte las pilas de modo que los polos queden situados en las posiciones correctas. La carga de pilas recargables debe tener lugar empleando un cargador apropiado y bajo la supervisión de un adulto. Las pilas recargables no se pueden cargar mientras permanecen insertadas en el producto; no intente hacerlo. No trate de cargar pilas no recargables. No cortocircuite el compartimento de las pilas.

Vigtige oplysninger om batterier

Brug aldrig forskellige batterityper sammen eller en kombination af gamle og nye batterier. Fjern altid batterierne, hvis produktet ikke skal bruges i lang tid, eller hvis batterierne er flade. Brug aldrig beskadigede batterier. Brug kun den anbefalede type batterier eller en tilsvarende type. Sæt batterierne i, så polerne vender den rigtige vej. Genopladelige batterier skal oplades i den rigtige batterioplader. Batterierne skal sættes i opladeren under opsyn af en voksen. Batterierne kan ikke oplades, mens de stadig sidder i produktet, og man må aldrig forsøge at gøre det. Forsøg aldrig at oplade ikke-genopladelige batterier. Kortslut aldrig batteriholderen.
