## THE AT-ST CLEANS UP NICELY

It's been nearly two decades since we last released a LEGO® *Star Wars™* Ultimate Collector Series version of the AT-ST Walker (10174, in 2006). Since then, the saga has continued to attract new generations of film, streaming series and LEGO *Star Wars* fans. Nothing makes us happier than sharing highly detailed models of popular vehicles like this with you and, hopefully, inspiring and thrilling fans everywhere. Since the Battles of Hoth and Endor in *The Empire Strikes Back* and *Return of the Jedi*, updated versions of the AT-ST walkers have appeared in *The Last Jedi*, *Rogue One: A Star Wars Story* and *The Mandalorian*. With this model, we return to its original design, with more details and features than ever before.

Enjoy building!

**Jens Kronvold Frederiksen**

## **ALL TERRAIN SCOUT TRANSPORT – THE AT-AT'S TERRIFYING COUSIN**

The AT-ST walkers, which are often operated alongside the larger AT-AT walkers, are vital to the Empire's forces. A two-man scout vehicle with chin-mounted blaster cannons and side-mounted concussion launchers, it excels in reconnaissance and ground support missions. It moves faster than the AT-AT, with a gyro-stabiliser and an advanced locomotion system, giving the walker its distinct, creature-like walk. In the peaceful forests of Endor, they crush through the Ewoks' natural sanctuary, seemingly unstoppable. In the chaos, the Rebels' mission to deactivate the Death Star's deflector shield hangs in the balance. That is, until, as with other Imperial expeditionary forces, the Rebels and their allies find clever ways to use the walkers' weaknesses to their advantage. The Ewoks, armed with handcrafted weapons and rocks, valiantly defend their home with ingenious traps, allowing Chewbacca and a few clever Ewoks to hijack one. The path to victory is secured.

## **FROM THE LEGO® STAR WARS™ DESIGN TEAM**

Most *Star Wars™* vehicles are famously rugged-looking and show authentic signs of wear and tear. Subtle colour nuances in this model hint at rust and dirt marks from trekking through the forests of Endor and, for the first time, we have a detailed interior as well. Building a vehicle of this shape, with skinny legs and a big, heavy 'head', takes some engineering. In the film versions, the legs were stabilised with a horizontal steel rod – not an option in a LEGO® version! We experimented with proportions and tweaked the design to find the optimal centre of gravity. We added non-slip rubber elements to the bottom of the footpads, elongated both the pads and fence-cutting blades slightly, and posed the legs at an angle. This helped us create a dynamic pose and secure the model's stability.

## DETAILS FROM HEAD TO TOE

Greebling details are a characteristic of *Star Wars™* vehicles, and we always have fun recreating them. As you build, look for unusual LEGO® elements like ski poles and paint rollers!

Inside the cockpit, controls, viewscreens and holoprojectors help Imperial pilots see ahead and behind them to navigate any terrain and spot incoming threats.

Swing open the entire top section for a closer look inside.

The hatch opens from front to back to let pilots enter and exit the walker.

Move the 'head' from side to side.

The light blaster cannon (left) and concussion launcher (right) rotate up and down.

The chin-mounted twin-blaster cannon moves up and down.
