# Puppy Bio

**Introduction:** Oh boy oh boy, is this the best day ever?! Are you my new best friend? I'm so happy to meet you. Did you hear that rattle in the box? That was me - practising my zoomies (they're my favourite thing)!

**Name:** YOU should give me a name! If you want to, you can write it here:  

**Hobbies:** Got any LEGO® peanut butter? Yes, please. LEGO tennis balls? Obviously. Sticks? Big yes. Do you have a cat? A LEGO cat, maybe? I'd like to play with it. I have a heart of gold (and bricks), so I promise I'll be good.

**Special talents:** Making my humans smile (of course). I already know how to sit, shake, wag my tail (a lot), and give high fives. I can also be really quiet. Give me a few busy hours on puppy duty, and then I definitely need a nap. But for now, can we play already? Yay!

## From the LEGO® Icons Design Team

The Golden Retriever is one of the most family-friendly and recognisable dog breeds. We've trained this puppy with lots of love, and now that it's ready to move into its forever home, we hope you'll love it as much as we do!

When designing any creature, we always start with the eyes and face to reflect and define the animal's personality and make it look realistic. It turns out that minifigure helmets double surprisingly well for these puppy dog eyes when decorated with a crescent moon shape! We then designed several points of articulation, using a new building technique that involves joining two sections before building the exterior. The head can move side to side and tilt left and right, and the mouth can open and close. The ears move, the tail can be posed on either side, and the left paw can be placed on the ground or reached out.

So now we hand the lead to you and wish you and your new best friend a happy building adventure together!

"I'm so happy to meet you - you're my new best friend!"

"Oops, I didn't mean to eat this; was it important?"

24

25

26

27

28

  
Puppies can be notoriously wobbly on their feet during their first few months. These LEGO® Technic beams are used to make sure that this puppy's structure is strong and stable!

With the way their legs often flail about, you'd think puppies' joints were made of rubber bands! We've used small ball joints here to attach the limbs while ensuring a strong connection and a unique angle.

This puppy can't wait to learn new tricks. The front legs are built differently – the left front leg can point upwards in a 'shake paw' or 'high five' pose.
